

Design Concept

The design concept of this house is "the future of a growing family." Step into the living / dining room and experience the design concept. We have prepared a space that can accommodate various family structures.

For example, a family with a small child can fully communicate with the child from the kitchen and maintain a safe environment for the child.

Adult families can also set up the perfect layout for a party with many friends.

Apart from a spacious living / dining space, it can be used as a family living room, study, or formal reception room.

The keyword for interior design is "Nature and peace of mind", and the highest quality functions and the space that composes it use materials that image nature.
